

Track Kerbs System

With Team Tetsujin's Track Kerbs System, you can make any course layout for any purpose. Have the freedom to design a realistic practice course. Combinations are endless!

Our Track Kerbs Systems are used at many circuits in Japan.

A 0.2mm line is carved on the surface of the kerbs system to allow wheels to slide off easily. When the wheels run on the line, they will also make particular sounds, allowing you to mark yours or other people's performance precisely.

Item	Item#	Parts	Color	JAN	Set Length	Price
 Straight	TT-7222	50P	Red 25P & White 25P	4560354072222	7.5m	¥10,286
